PROFESSIONAL SUMMARY

Results-driven B.Tech CSE 2025 graduate with end-to-end ownership of 3 independently designed and deployed production-grade applications in Python, SQLite, and full-stack web development. Demonstrates strong analytical ability through GATE 2025 qualification (AIR 14088, Score 406) and Global Rank 3536 in TCS CodeVita Season 12 — among the top 4% of 100,000+ global participants. Qualified TCS NQT and shortlisted for TCS Prime interview; holds a confirmed TCS Ninja offer letter. Proven ability to architect multi-module systems covering authentication, transaction management, reporting, and automated deployment. Strong communicator, collaborative team player, and proven leader with 4 years as Class Representative.

SKILLS

Languages:	Python (Primary), JavaScript (ES6+), C, C++, HTML5, CSS3
Databases:	SQLite, MySQL — CRUD, JOINS, Transactions, Normalization, Indexing, Aggregate Functions
Frameworks:	Node.js, Express.js, React.js, Bootstrap 5, REST API Development
Concepts:	OOP, DSA, DBMS, OS, Computer Networks, REST APIs, MVC, SDLC, Agile, Debugging, Unit Testing
Tools:	Git, GitHub, VS Code, PyInstaller, Postman, Linux/Unix, Vercel, Netlify, Render, GitHub Pages
Soft Skills:	Problem Solving, Analytical Thinking, Communication, Team Collaboration, Leadership, Ownership, Adaptability, Time Management, Attention to Detail

PROJECTS

Bank Management System | Python · SQLite · SHA256 · smtplib [GitHub ↗](#)

- Architected a 5-module CLI banking system (Accounts, Loans, Transactions, Admin, Security) with SHA256-hashed authentication, CRUD for Savings/Current accounts, fund transfers with minimum balance enforcement, and EMI calculation across 4 loan types
- Engineered account freeze/unfreeze, 10-transaction mini statement, forgot-PIN via email OTP (smtplib), and admin panel with full-text search and automated CSV reporting; packaged as zero-dependency Windows .exe via PyInstaller

Student Result Management System | Python · SQLite · SHA256 [GitHub ↗](#)

- Built an end-to-end result management platform with role-based admin authentication, automatic grade/division calculation, and subject-wise class analytics using SQL aggregate functions (AVG, MAX, MIN) with ranked leaderboard via ORDER BY/LIMIT
- Implemented multi-admin management, SHA256-secured password reset, CSV export of results, and standalone .exe distribution — demonstrating full SDLC ownership from design to deployment

Railway Reservation System | Python · SQLite · SHA256 [GitHub ↗](#)

- Designed an IRCTC-style reservation engine for 10,000+ trains with multi-class seat availability (Sleeper, AC3, AC2), confirmed/waitlist booking, PNR generation, automated refund processing, and real-time waitlist promotion on cancellation
- Engineered a fully normalized SQLite schema with foreign key constraints across 4 core tables (trains, passengers, bookings, waitlist); SHA256 session management and atomic transactions to prevent double-booking race conditions

EDUCATION

B.Tech — Computer Science Engg.	Maharshi Dayanand University (MDU)	2021 – 2025	66.31%
12th — PCM + Computer Science	Kendriya Vidyalaya Ganeshkhind, CBSE	2021	76.20%
10th	Kendriya Vidyalaya BEG, CBSE	2019	74.40%

ACHIEVEMENTS & CERTIFICATIONS

- GATE 2025 Qualified — CS & IT, AIR 14088, Score 406 · Demonstrates mastery across Algorithms, DBMS, OS, Computer Networks, and Theory of Computation
- Global Rank 3536 — TCS CodeVita Season 12 · Top 4% among 100,000+ participants in one of the world's largest international competitive programming competitions
- TCS Ninja Offer Letter via TCS NQT — qualified national assessment, shortlisted for TCS Prime interview; confirmed offer letter received, awaiting joining
- Class Representative · 4 Years — led a cohort of 60+ students; coordinated academics, resolved conflicts, liaised with faculty and administration
- Web Development Bootcamp (Udemy, Angela Yu) — built full-stack projects using HTML, CSS, JavaScript, Node.js, Express.js, React.js, MongoDB, REST APIs
