PROFESSIONAL SUMMARY

B.Tech Computer Science graduate (2025) with hands-on experience designing, coding, and debugging production-grade Python/SQLite applications across authentication, transaction processing, and automated reporting, plus full-stack (MERN) web development. Skilled in root-cause debugging, systematic testing, and technical documentation, with practical exposure to the full SDLC, Agile delivery, and Git/GitHub version control. Validated technical aptitude through GATE 2025 (AIR 14088, Score 406) and a Global Rank of 3536 in TCS CodeVita Season 12 (top 4% of 100,000+ participants); holds a confirmed TCS Ninja offer letter. Seeking to contribute as a Software Engineer, Technical/Application Support Engineer, or Graduate Trainee.

SKILLS

Languages: Python (Primary), JavaScript (ES6+), SQL, C, C++, HTML5, CSS3, Java

Databases: MySQL, SQLite, MongoDB — CRUD, Joins, Transactions, Normalization, Indexing, Schema Design, Data Validation & Reconciliation

Frameworks & Tools: Node.js, Express.js, React.js, REST API Development, Git/GitHub, Postman, PyInstaller, VS Code, Linux/Unix

Concepts: OOP, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, SDLC, Agile, Debugging, Unit Testing, Root-Cause Analysis, Technical Documentation

Soft Skills: Problem Solving, Analytical Thinking, Communication, Cross-Functional Collaboration, Ownership, Stakeholder Management

PROJECTS/EXPERIENCE

Bank Management System | Python · SQLite · SHA256 · smtplib

- Designed and coded a 5-module CLI banking application (Accounts, Loans, Transactions, Admin, Security) with SHA256-secured authentication, full CRUD for Savings/Current accounts, and fund transfers under minimum-balance enforcement.
- Built EMI calculation logic across 4 loan types and email-based OTP recovery via smtplib, then automated CSV reporting and admin search for reconciliation, resolving edge cases through iterative debugging and unit testing.
- Packaged the application as a standalone Windows executable via PyInstaller, enabling zero-dependency deployment and end-to-end SDLC ownership from requirements through release.

Railway Reservation System | Python · SQLite · SHA256

- Engineered an IRCTC-style booking engine for 10,000+ trains with multi-class booking, PNR generation, automated refunds, and real-time waitlist promotion on a normalized schema spanning 4 linked tables with foreign key constraints.
- Implemented atomic transactions to prevent race conditions and double-booking during concurrent access, following an Agile build process with version-controlled commits and systematic debugging of edge cases.

Student Result Management System | Python · SQLite · SHA256

- Developed a role-based result management platform with secure admin authentication and OOP-based, modular code for automatic grade/division calculation.
- Used SQL aggregate functions (AVG, MAX, MIN) to build subject-wise analytics and a ranked leaderboard, and added multi-admin management, SHA256-secured password reset, and CSV export.

Saathi — AI Senior Life Companion App | Gemini AI · Firebase · JavaScript · Android (Median.co)

- Owned a voice-first AI companion app for senior citizens end-to-end through the SDLC — requirement gathering, design, coding, testing, and deployment as a cross-platform Android APK — integrating Gemini AI for natural conversation.
- Built persistent, structured data storage on Firebase Realtime Database and documented the project fully for the Redrob Ideathon submission.

EDUCATION

B.Tech, Computer Science Engineering — Maharshi Dayanand University

2021–2025

12th — PCM + Computer Science — Kendriya Vidyalaya Ganeshkhind

2021

10th — Kendriya Vidyalaya BEG

2019

ACHIEVEMENTS & CERTIFICATIONS

- GATE 2025 Qualified — Computer Science & IT, AIR 14088, Score 406 — strong fundamentals across Algorithms, DBMS, Operating Systems, Computer Networks, and Theory of Computation.
- Global Rank 3536 — TCS CodeVita Season 12, Top 4% among 100,000+ participants — demonstrates strong Python problem-solving ability at scale.
- TCS Ninja Offer Letter (via TCS NQT) — cleared national-level technical assessment; shortlisted for TCS Prime interview; confirmed offer letter received.
- Class Representative, 4 Years — coordinated academics and communication for a 60+ member cohort, resolving conflicts and liaising with faculty.
- Web Development Bootcamp (Udemy, Dr. Angela Yu) — HTML, CSS, JavaScript, Node.js, Express.js, React.js, MongoDB, REST APIs.
